

# OPTIcontrol OMS 9061

The data processing unit **OPTIcontrol 9061** facilitates the digital processing of measuring values of the **OPTImess** and **OPTIline** sensors.

The standard software of the basic version is designed for general applications (distance measuring, thickness measuring, tolerances monitoring, etc.)

The **OPTIcontrol 9061** system processes the measuring values of one or two **OPTImess** (or **OPTIline**) transducers.

- Mountable basic shell with LCD display
- Microprocessor-Bus
- Microprocessor unit with standard software
- Data processing unit for capturing the measuring values of **OPTImess** and **OPTIline** systems
- Digitale I/O modul for the bidirectional communication with peripheral devices like: SPS, selector etc...
- RS 232 interface
- Analog output
- Power supply (110-220V, 50-60 Hz) for **OPTImess** and **OPTIline** transducer
